WATER TANK INSULATION JACKET

A water tank insulation jacket is a protective covering designed to reduce heat loss in hot water tanks. wrapped in a durable, weather-resistant outer layer. These jackets help maintain the water's temperature, improving energy efficiency and reducing heating costs by minimizing heat loss, especially in cold environments. They are easy to install and come in various sizes to fit different tank dimensions.

SPECIFICATION :

- **Temperature remains maintained 24x7 365 days .**
- **Save electricity, it works without electricity.**
- **High green strength, and high tensile strength.**
- **It's maintained 50° temperature.**
- **The jacket thickness is 25 to 30mm.**
- **Maintenance Free/ Resistance to fungi & Bacteria**
